

## **INSTRUCTIONS**

### **HEADLIGHT LENS POLISH:**

#### **A) Preparation:**

1. Wash Headlights thoroughly to remove dirt.
2. Mask the complete area around the headlight lens with a broad adhesive plastic tape to protect it from any treatment.

#### **B) For matt patches and Yellowing:**

1. Firmly polish the lense to a mirror finish using the QUIXX Headlight Polish, the polishing cloth and the rubber block. The firmer you press and the faster you polish, the sooner you are done. If the lens is extremely bad or some areas did not come clean with just the polish, then proceed to " C ".

#### **C) For heavily marred Lenses:**

1. Equally wet-sand the affected headlight area horizontally until the major imperfections are not visible any more, using the sanding block with the 2000 grit sandpaper and water. Remove residue.
2. Equally wet-sand the affected headlight area vertically until the smaller imperfections are not visible any more, using the sanding block with the 3000 grit sandpaper and water. Remove residue.
3. Equally wet-sand the affected headlight area horizontally again until the surface is smooth and uniform, using the sanding block with the 5000 grit sandpaper and water. Remove residue.
4. Firmly polish the treated area vertically to a mirror finish using the QUIXX Headlight Polish, the polishing cloth and the rubber block. The firmer you press and the faster you polish, the sooner you are done.

#### **D) Final Steps:**

1. Remove any residue with a wet cloth.
2. Remove the masking tape surrounding the lens.
3. Seal the restored headlights with QUIXX HEADLIGHT LENS SEALER keeps the lenses cleaner and clearer for longer.

### **HEADLIGHT LENS SEALER:**

1. Clean the headlight lens thoroughly.
2. Shake bottle well and spray some QUIXX sealer onto the lens and spread it evenly using a damp, clean cotton cloth.
3. Allow the sealer to dry to a haze (at least 45 minutes).
4. Buff the lens to a high gloss with a clean cotton cloth.
5. For max. protection repeat application every 3-6 months.
