

## Intense All Metal Polish Kit

### Instructions For Use By Hand:

- 1 Clean surface from coarse dirt to avoid scratches.
- 2 Apply a small amount of polish to the surface.
- 3 Gently rub the polish over the metal surface with a clean cloth until a black residue appears.
- 4 Hard rubbing is not necessary and can reduce the chrome layer.
- 5 Buff off residue with terry cloth or micro-fiber towel.

### Instructions For Use With Energy Polishing Cone:

- 1 Apply the polish directly to the Energy Cone and then place the cone against the surface to be polished. Do not start the cone without it touching the surface or it will splatter. If using a drill, keep rpm's between 200 and 300 and only slight/little pressure should be applied. The polishing tool should only be used with solid, uncoated metals (uncoated solid alloy wheels).
- 2 To clean polishing tools and cloths, hand wash with warm water and liquid dish washing soap. Do not attempt to clean or submerge the polishing tool in water while attached to the drill as electrical shock may occur!

Danger: Harmful or fatal if swallowed. Call physician immediately. Vapor harmful. Skin and eye irritant. Highly flammable. Harmful in contact with skin or if inhaled. Causes skin irritation and serious eye irritation. Suspect of damaging fertility or the unborn child. May cause drowsiness or dizziness.

Precautionary Measures: Do not handle until all instructions and safety precautions have been read and understood. KEEP OUT OF REACH OF CHILDREN. Keep away from open flames – no smoking.
