

SCUFF OFF X-PRESS KIT

POWERFUL 1-STEP SCUFF REMOVER

INSTRUCTION MANUAL

(EN) No matter how hard you try, scuffs, scrapes, and fine scratches will introduce themselves to your car's paint finish at some point in time. QUIXX SCUFF OFF will permanently remove these unsightly scuffs/blemishes quickly, reliably, and safely from regular glossy paint finishes.

In fact, QUIXX SCUFF OFF is so effective that one small drop is all that's needed to the job. You'll be amazed at just how easy it is to maintain your car, motorcycle, boat, or caravan. For deeper scratches, we recommend using QUIXX High Performance Scratch Remover.

INSTRUCTIONS:

1. PREPARATION:

Clean blemished area to remove coarse dirt. Test product on small concealed area for paint compatibility first.

2. APPLICATION:

Apply a drop (peanut-size) of QUIXX SCUFF OFF to the blemished spot and polish it for about 1-2 minutes with the enclosed clean cloth in a right angle to the scuff/blemish applying pressure. Remove residues with a damp cloth. Repeat application if necessary. On some dark paint finishes the treated area can look slightly "milky". This milkyness can be removed with a regular car polish - just polish area for 10-20 seconds firmly.

For deeper scratches, we recommend using the QUIXX High Performance Scratch Remover (ITEM # 00070-US).

ATTENTION:

Use according to instructions! Not suitable for extremely deep scratches. Do not use on matte paint and non-scratch/nano paint finishes. It is recommended to first test suitability on a concealed area.

FIRST AID GENERAL ADVICE:

If used according to the instructions, no risks are expected for the user. Avoid contact with eyes and mouth. In case of contact with eyes and mouth flush with plenty of clear water. If swallowed, do not induce vomiting.

HANDLING AND STORAGE:

Keep out of reach of children. Keep away from food, drink and animal feed.

EMERGENCY INFO:

For 24-hour emergency assistance, call INFOTRAC at 1-800-535-5053
