

# Paint Repair Pen

## Instructions:

- 1 Use soap & water to thoroughly clean, then dry the area to be treated.
- 2 Shake the pen vigorously for approx. 30 seconds.
- 3 Remove the cap and, with the tip facing upwards, ventilate the pen by pressing on the felt tip one time (e.g. with the cap).
- 4 Turn pen over and press the tip down on a piece of paper (up to 20 times) until the clear coat flows to the felt tip.
- 5 Place the point on one end of the scratch and carefully guide along to the opposite end (\*).
- 6 If additional coats are needed, repeat the application process after 30 minutes drying time.
- 7 Firmly replace the cap to protect the pen from drying out.
- 8 If desired, the Quixx Paint Scratch Remover can be used to further smooth the repair after a minimum of 48 hours drying time.

### (\* Important:

For best results always apply thin layers of PRP. Be very careful to avoid getting clear coat outside the confines of the scratch in order to prevent excess and dripping. In the event of excessive clear coat dripping, remove immediately with a paper towel. Try to soak up the liquid with the edge of a paper towel rather than wiping since that will cause smearing. If the clear coat has already hardened, it can be removed with an acetone based nail polish remover. Simply moisten a clean, non-colored (white) cotton cloth with the polish remover (do not apply the nail polish remover directly to the paint, only to the cloth). Once the clear coat has been removed, wipe any residue of nail polish remover with a clean, dry cloth, and apply a quality car wax to the area. We recommend testing the nail polish remover for paint compatibility on an inconspicuous spot (ie: inside the trunk, etc.) before actual application.

Danger: Harmful or fatal if swallowed. Call physician immediately. Vapor harmful. Skin and eye irritant. Highly flammable. Harmful in contact with skin or if inhaled. Causes skin irritation and serious eye irritation. Suspect of damaging fertility or the unborn child. May cause drowsiness or dizziness.

Precautionary Measures: Do not handle until all instructions and safety precautions have been read and understood. KEEP OUT OF REACH OF CHILDREN. Keep away from open flames – no smoking. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Avoid breathing vapors. Wash hands thoroughly after handling.

Handling and Storage: KEEP OUT OF REACH OF CHILDREN. Keep away from food, drink, and animal feed. Use only outdoors or in a well-ventilated area. Wash hands thoroughly after handling. Dispose of this material and its container to hazardous or special waste collection point.

First Aid: If on skin: Wash with plenty of soap and water. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If exposed or concerned, get medical advice / attention.

Warning: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

Contains: Xylene, Toluene
